ENVIRONMENTAL SURVEILLANCE AT HANFORD FOR CY-1973 DATA

by

W. L. Nees and J. P. Corley
Occupational and Environmental Safety Department

April 1974

BATTELLE
PACIFIC NORTHWEST LABORATORIES
RICHLAND, WASHINGTON 99352

During 1973, Hanford facilities were operated for the U.S. Atomic Energy Commission by: Atlantic Richfield Hanford Company, Pacific-Northwest Laboratories of Battelle Memorial Institute, United Nuclear Industries, Inc., Westinghouse Hanford Company, and Hanford Environmental Health Foundation.

Preface

This supplemental report is a compilation of results obtained from both analyses of environmental samples and from radiological measurements made in the Hanford environs during 1973. The significance of these data is discussed in the parent report, BNWL-1811.

The term "analytical limit" as used in this report is the concentration at which the laboratory can measure the radionuclide with a precision of ± 100% at the 90% confidence level. The detection limit for a specific radionuclide varies with sample type, sample size, counting time, and the amounts of interfering radionuclides present. The "analytical limits" where chosen to represent upper bounds to these fluctuating detection limits.

The following rule has been applied for determining statistical detection levels for averaged data:

$$A.L._{avg.} = \frac{A.L._i}{\sqrt{n}}$$

The laboratory analytical level is divided by the square root of the number of averaged results to obtain the estimated analytical level for the average for the same confidence level and precision. This rule is applicable only when actual net counting data is available, as it is for most routine radioanalyses.

Air and sanitary water quality data included in this data tabulation were obtained and provided by R.G. Anderson, of the Hanford Environmental Health Foundation, Richland, Washington. The latter organization conducts the routine surveillance program of this kind at the Hanford plant for the U.S. Atomic Energy Commission.

The majority of the radioanalyses documented here were performed by the U. S. Testing Company, Richland, Washington, under contract to the Atomic Energy Commission. Large volume water samples and core samples were obtained and analyses provided by the Radiological Chemistry section of Battelle Northwest Laboratories, R. W. Perkins, Manager.

April 1974

W. L. Nees
J. P. Corley

TABLE OF CONTENTS

APPENDIX A
RADIONUCLIDES IN COLUMBIA RIVER WATER

Table		Page
1	Concentrations of Radionuclides in the Columbia River at Vernita (Monthly Composites of Weekly Grab Samples)	1
2	Concentrations of Radionuclides in the Columbia River at Richland (Cumulative Samples)	2
3	Concentrations of Radionuclides in the Columbia River at Richland (Monthly Composite of Weekly Cumulative Samples)	4
4	Concentrations of Radionuclides in the Columbia River at 100-B (Cumulative Samples)	5
5	Concentrations of Radionuclides in the Columbia River at 100-N (Grab Samples)	6
6	Concentrations of Radionuclides in the Columbia River at 100-D (Grab Samples)	7
7	Concentrations of Radionuclides in the Columbia River at Bonneville Dam (Monthly Composite of Weekly Cumulative Samples)	8
8	Estimated Rate of Transport of Radionuclides in the Columbia River Water at Richland (Cumulative Samples)	9
9	Estimated Rate of Transport of Radionuclides in the Columbia River at Richland (Monthly Composite Cumulative Samples)	11
10	Estimated Rate of Transport of Radionuclides in the Columbia River Water at Bonneville Dam (Monthly Composite Cumulative Samples)	12
11	Beta Activity in the Columbia River at Richland (Cumulative Samples)	13
12	Beta Activity in the Columbia River at 100-B (Cumulative Samples)	14
13	Beta Activity in the Columbia River at 100-N (Grab Samples)	15
14	Beta Activity in the Columbia River at 100-D (Grab Samples)	16
15	Concentrations of Radionuclides in the Columbia River at the 300 Area (Part A)	17
15	Concentrations of Radionuclides in the Columbia River at the 300 Area (Part B)	18
16	Concentration of Radionuclides in Columbia River at McNary Dam	19

TABLE OF CONTENTS (Continued)

APPENDIX B
RADIONUCLIDES IN DRINKING WATER

Table		Page
1	Concentrations of Radionuclides in Richland Drinking Water (Cumulative Samples)	23
2	Concentrations of Radionuclides in 300 Area Drinking Water (Cumulative Samples)	25
3	Beta Activity in Richland Drinking Water (Cumulative Samples)	27
4	Beta Activity in 300 Area Drinking Water (Cumulative Samples)	28
5	Beta Activity in 100-N Drinking Water (Cumulative Samples)	29

APPENDIX C
RADIONUCLIDES IN FISH AND WILD FOWL

1	Concentrations of Radionuclides in Muscle of Whitefish Taken from the Columbia River	33
2	Concentrations of Selected Radionuclides in the Muscle of Waterfowl Samples Along the River in the Hanford Environs	34
3	Concentrations of Radionuclides in Upland Game Bird Samples in the Hanford Environs	37

APPENDIX D
RADIONUCLIDES IN SHELLFISH

1	Concentration of Radionuclides in Oysters from Willapa Bay, Washington	41

APPENDIX E
RADIONUCLIDES IN THE ATMOSPHERE

1	Concentrations of I-131 in the Air of the Hanford Environs	45
2	Concentrations of Radioactive Beta Particulates in the Air of the Hanford Environs (Part A)	47

TABLE OF CONTENTS (Continued)

APPENDIX E (Continued)
RADIONUCLIDES IN THE ATMOSPHERE

Table		Page
2	Concentration of Radioactive Beta Particulates in the Air of the Hanford Environs (Part B)	49
3	Concentrations of Radioactive Alpha Particulates in the Air of the Hanford Environs (Part A)	51
	Concentrations of Radioactive Alpha Particulates in the Air of the Hanford Environs (Part B)	53
4	Concentrations of Specified Radionuclides on Selected Air Filter Composites	54

APPENDIX F
RADIONUCLIDES IN FARM PRODUCE AND COMMERCIAL FOODSTUFFS

1	Concentrations of Radionuclides in Milk	59
2	Concentrations of Radionuclides in Locally Purchased Meat	66
3	Concentrations of Radionuclides in Locally Purchased Leafy Vegetables	67
4	Concentrations of Radionuclides in Locally Purchased Chicken and Eggs	68

APPENDIX G
RADIONUCLIDES IN SOIL AND VEGETATION

1	Concentrations of Radionuclides in Perimeter Soil Samples	71
2	Concentrations of Radionuclides in Perimeter Vegetation Samples	73

APPENDIX H
MEASUREMENTS OF EXTERNAL RADIATION EXPOSURE

1	TLD Measurements in the Columbia River	77
2	External Exposure Rate Measurement at 3 Feet Above the Columbia River Shoreline at Vernita, Richland, and Sacajawea Park	80
3	TLD Measurements at 3 Feet Above the Ground (Part A)	81

TABLE OF CONTENTS (Continued)

APPENDIX H (Continued)
MEASUREMENTS OF EXTERNAL RADIATION EXPOSURE

Table		Page
3	TLD Measurements at 3 Feet Above the Ground (Part B)	83
	TLD Measurements at 3 Feet Above the Ground (Part C)	85

APPENDIX I
WATER QUALITY MEASUREMENTS OF COLUMBIA RIVER WATER

1	Nitrates in Columbia River Water at Vernita and Richland	89
2	Water Quality Measurements in Columbia River Water at Vernita	90
3	Water Quality Measurements in Columbia River Water at the 300 Area	92
4	Biological Measurements of Columbia River Water at Vernita and Richland	99
5	Temperatures of Columbia River Water at Priest Rapids Dam and Richland	100

APPENDIX J
NITRATE ION IN DRINKING WATER

1	Nitrate Ion in 300 Area and Richland Drinking Water	103

APPENDIX K
SUSPENDED PARTICULATES AND NITROGEN IN THE ATMOSPHERE

1	Suspended Particulates in the Air at Richland, 747 Bldg.(Part A)	107
	Suspended Particulates in the Air at Richland, Federal Bldg. (Part B)	109
2	Nitrogen Dioxide in the Air at the Hobkirk Ranch	110
3	Nitrogen Dioxide in the Air at the Gillium Ranch	111
4	Nitrogen Dioxide in the Air at the Sullivan Ranch	112
5	Nitrogen Dioxide in the Air at the Keys Ranch	113

TABLE OF CONTENTS (Continued)

APPENDIX L
SEDIMENT SAMPLES FROM THE COLUMBIA RIVER

Table		Page
1	Sediment Samples from the Columbia River	117
2	NcNary Reservoir Surface Sediment	122
